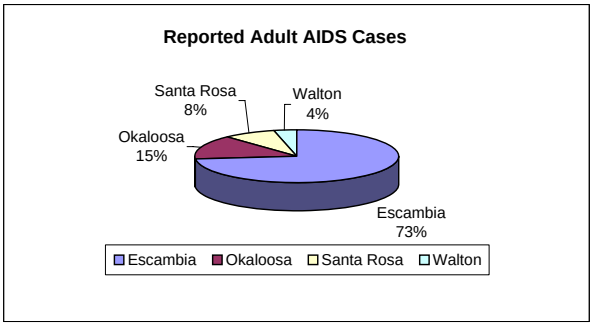
Walton	35	42	**77**	**55%**
Total	926	1,206	**2,132**	**57%**

Please note that vital status data in this table is calculated differently than for the tables that follow. Living data on the next pages are calculated based on current age whereas the table above is calculated based on age at diagnosis. Therefore, there is a small difference between the two because a small number were children <13yrs at diagnosis whose current age makes them adults.



Data in chart excludes cases reported from within the Dept of Corrections.
